Snatcher North Appraisal and Development

Snatcher North-1 Follow Up Wells

1. Snatcher North-2 (Appraisal)
   To potentially extend field to the North

2. Snatcher-12 (Water Injector)
   To increase recovery from SN-9 and SCN-1

3. Snatcher North-3 (Water Injector)
   Recover additional volumes from Snatcher North
Westeros 3D seismic shoot
Summary

• committed to South Australia and the ongoing development of our acreage in the Cooper Basin
• Gemba gas well production supplied into the SA market shortly
• drilling campaign underway that could potentially unlock substantial resources
• starting the first phase of water injection to maximise field recovery
• hoping our latest seismic shoot will reinvigorate exploration in the western Cooper Basin.
• cash generated from capital intensive projects now will allow a return to a higher South Australia work program in the future.
